TITLE V (RENEWAL) PERMIT NO. V-05-085

TRANSMONTAIGNE PRODUCT SERVICES INC – GREATER CINCINNATI TERMINAL

COVINGTON, KENTUCKY

JUNE 15, 2006

REVIEWED BY KENVIRONS, INC.

SOURCE I.D. #: 021-117-00004

SOURCE A.I. #: 2504

ACTIVITY #: APE20040001

EXECUTIVE SUMMARY:

On June 20, 2003, the Division for Air Quality received an application from TranMontaigne Product services, Inc for renewal of a Title V permit to operate a bulk gasoline terminal in Covington, Kentucky. The permitted emission units are a loading rack, petroleum product storage facilities, barge loading equipment, two (2) asphalt heaters, asphalt loading equipment, and fugitive emissions to load, store, and move petroleum products.

The issuance of a federally enforceable Title V renewal permit requires a preliminary determination and a public notice. This has been completed by the Division. On June 21, 2006, a notice of availability of the draft permit and supporting material for comments by persons affected by the source was published in the *The Enquirer*. The public comment period expired 30 days from the date of publication. During this time, comments were received from the company. Responses to comments were documented in the Response to Comments section of the proposed permit package.

In conclusion, a thorough analysis has been made of all relevant information available which pertains to this application. The Division has concluded that the plant will comply with all air quality regulations and requirements. Therefore, a final determination has been made to issue a proposed permit which will become final upon approval by the U.S. EPA.
